Well No. 1, located 330 ft from line of road, 28

DEPT. OF THE INTERIOR, GEOLOGICAL SURVEY

Report

The nature of the drill formation is as follows:

DETAILS OF WORK

This well is presently containing an amount of water from the basal Yates zone at 1050 to 1070 feet. Since the well is filling up and string

periodically, we have to remove the present amount of water approximately 10,000 gallons and 10,000 pounds of sand. We plan to perforate the basal section in the Yates zone at 1076 to 1120 feet and from this section will approximately 20,000 gallons and 20,000 pounds of sand to the line on the surface. The water will
