SUNDRY NOTICES AND REPORTS ON WELLS

NOTICE OF INTENTION TO DRILL.....	SUBSEQUENT REPORT OF WATER SHUT-OFF.....
NOTICE OF INTENTION TO CHANGE PLANS.....	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING.....
NOTICE OF INTENTION TO TEST WATER SHUT-OFF.....	SUBSEQUENT REPORT OF ALTERING CASING.....
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL.....	SUBSEQUENT REPORT OF RE-DRILLING OR REPAIR.....
NOTICE OF INTENTION TO SHOOT OR ACIDIZE.....	SUBSEQUENT REPORT OF ABANDONMENT.....
NOTICE OF INTENTION TO PULL OR ALTER CASING.....	SUPPLEMENTARY WELL HISTORY.....
NOTICE OF INTENTION TO ABANDON WELL.....	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 25,

1959

Well No. 4 is located 330 ft. from N line and 2310 ft. from E line of sec. 28  
NE - NW Sec. 28 23-6 36-2 NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Grant Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3350 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The Lynn #4 was recompleted on July 6, 1959, by plugging back to 3508 feet and perforating the Basal Yates zone from 3550 to 3574 feet. The perforated section was fraced on August 5th with 10,000 gallons of Low Friction Frac carrying 1/2 per gallon of 20/40 sand. The frac job was divided equally into two stages with 20 rubber balls being dropped between. The major portion of the material was pumped in at a rate of 20 BPM with a surface pressure of 2800#. The well was flushed with 80 barrels of oil at end of frac job.

A 2 1/2 hour test on August 16th showed the well capable of 22 barrels of oil with 1/2 barrels of water in a 20/40" choke with a tubing pressure of 280# and a GOR of 11,209 to 1.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
