OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico

Gentlemen:

Following is a notice of intention to do certain work as described below at the

American Republics Corporation B. Davis Well No. 1 in SWSW
Company or Operator Lease
of Sec. 34, T. 23, R. 36, N. M. P. M. Cooper-Jal Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

At present above well is producing from open hole 3565' to plug back depth 3578'. Well has been shut in temporarily due to high water volume and low oil volume (1400 barrels of water and 1 barrel of oil per day). It is our intention to rework the above well in the following manner: Run 2½" tubing to total depth and spot 25 sack cement plug on bottom. Raise tubing to 3475' and reverse out cement above 3475'. Pressure up on cement and let cement set 48 hours. Swab out all water and test well for water shut off. Pull tubing and perforate gas zones 3110' to 3115' and 3131' to 3136' and recompleat as gas well.

Approved _____, 19 _____
