Re: State LMT #5

Dear Mr. Ramey:

Amerada Hess requests approval to simultaneously dedicate a previously established 320 acre Jalmat gas proration unit to the following wells:

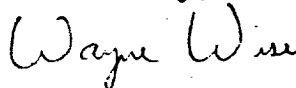

State LMT #2 - 1980' FNL & 1980' FWL
State LMT #5 - 660' FNL & 660' FEL

³⁶ The marginal unit currently consists of the N/2 of Sec. 36, T-23S, R-27E, with all the acreage dedicated to the State LMT #2 as per Order NSP-744 issued February 10, 1966.

State LMT #5 is currently dual completed, as an active injector in the Langlie Mattix Pool, and as a temporarily abandoned producer in the Jalmat Pool. Prior to being abandoned in the Jalmat Pool, #5 was classified as a Jalmat Oil well. Due to a high GOR it was closed-in and temporarily abandoned on July 1, 1965.

Amerada Hess Corporation believes approval of this request will protect correlative rights, and encourage the efficient recovery of gas reserves.

Yours truly,

Wayne Wise
