New Mexico Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

Attention: Mr. Joe D. Ramey

Dear Sir:

As requested in your letter of November 2, 1959 we are submitting a gas oil ratio test on the Amerada State LM"T" #5-C located in Unit A, Section 36, T-23-S, R-36-E in the Jalmat Gas Pool. In this letter the Commission granted Amerada a 60 day testing period to determine the proper classification of this well.

During this 60 day testing period the gas-oil ratio on this well had tended to increase. The test submitted October 9, 1959 showed a gas oil ratio of 36,750 and the test run 12-24-59 shows a gas oil ratio of 70,610. Since the gas oil ratio is increasing on this well and may pass 100,000 to 1 in the near future, Amerada Petroleum Corporation herewith requests a 60 day extension to the testing period in order that we may do further testing on this well to determine its proper classification.

Very truly yours,

AMERADA PETROLEUM CORPORATION

A. J. Troop
