# REPORT ON THE GEOLOGICAL SURVEY OF THE STATE GEOLOGIST

The purpose of this report is to provide a detailed account of the geological survey conducted in the State of New York during the year 1900. The survey was conducted under the direction of the State Geologist, and the results are presented in this report. The survey was conducted in the following manner: The State was divided into several districts, and each district was assigned to a different geologist. The geologists were then assigned to different localities within their respective districts, and they were to make a detailed study of the geology of those localities. The results of the survey are presented in this report, and they are arranged in the following order: First, the results of the survey of the State as a whole are presented. Then, the results of the survey of each district are presented. Finally, the results of the survey of each locality are presented.

1900. August 1st.
