DISSENT/ANALYSIS REPORTS ON WRITS

1. The first step in the process of identifying a problem is to determine the scope of the problem. This involves identifying the area of the organization that is affected by the problem and the extent of the problem. For example, if the problem is a decrease in sales, the scope of the problem would be the sales department and the extent of the problem would be the decrease in sales.

voiced or in the voiced class, **g* and **g*h are not included.
