17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well has been producing a large volume of water with a diminishing amount of oil for sometime. It is proposed that the well be plugged back from the presently producing Seven Rivers zone through perforations at 3522-3580 feet to 3505 feet. Then perforate various intervals in the Yates zone from 3250 - 3490 feet, frac with 40,000# and 40,000 gals. and test for commercial production. This proposed work can be started about May 10, 1972.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
