COMMENCE DRILLING OPNS. <input type="checkbox"/>	PLUG AND ABANDONMENT <input type="checkbox"/>
CASING TEST AND CEMENT JOB <input type="checkbox"/>	OTHER <input checked="" type="checkbox"/> Supplemental Well History

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

A study of well records to determine possible remedial work revealed that information reported on Form C-103 in 1961 was in error and that work was performed in 1964 and not reported.

1/26-29/61 Set cast iron bridge plug & cap with 8' hydromite, PBTD 3564. Perforated 3516-32 with sand drill and treat with 500 gallons mud acid, 10,000 gallons water & 10,000# 20/40 sand. Pump 10 bbls oil, no water, 45 MCF gas per day.

10/14/64 Perforate 3508-50 with 74 shots. Treat with 1,000 gallons regular acid & 250 gallons gelled acid with moth balls, pump 98% water.

It is now proposed to set retainer @ 3500 & squeeze all perforations, clean out to 3564, re-perforate interval 3516-32, acidize & frac and return to production.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Subject well has been shut in since May 1968 due to excessive water production. It is proposed to hydramite squeeze perfs 3402-20 and return to production. Work to begin on or about October 1 depending on the availability of pulling units.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
