Mr. F.J. Vesely
State Oil & Gas Inspector
Carlsbad, New Mexico.

Dear Sir:-

Our G.E. Cooper Well No.1. SW/4 of SW/4 of Section 11-24N-36E, is now producing such large volume of water that it frequently "goes dead". We wish to test the potentiality of the well in its present condition in order to determine what course of remedial work should be undertaken. For this purpose we request permission to use gas lift.

Yours very truly,

C.C. Cummings
Dist. Supt.
Gypsy Oil Company.
Hobbs, New Mexico.

Approved 
State Oil & Gas Inspector.
