W. K. DAVIS  
VICE-PRESIDENT  
IN CHARGE OF  
OPERATIONS

New Mexico Oil Conservation Commission  
P.O. Box 871  
Santa Fe, New Mexico

Gentlemen:

We herewith make application in triplicate for administrative approval of a non-standard gas proration unit of 160 acres consisting of the Southeast 1/4 of Section 12, Township 24S, Range 36E, Lea County, New Mexico. This unit is to be assigned to our Toby No. 1 casing completion in the Jalmat Pool, located 660' from the South Line and 660' from the East Line of Section 12, Township 24S, Range 36E. We attach herewith three copies of the plat of this unit showing the acreage involved, the location of the well, and the offset ownership.

We wish to make the following statements in compliance with Order No. R-520:

1. Our Toby #1 well was originally completed on February 19, 1937 as an oil well. Seven inch casing is set at 3256'. A formation packer is set at 3429' which effectively separates the Yates Gas Sand from the Oil Sand. This allows the Yates Gas to be produced through the casing. We propose to produce the casing side as a gas well and shut in the tubing side. A packer test on November 1, 1955 showed that this packer effectively separates these two zones. This packer test was witnessed by Mr. Reider and Mr. Armstrong with the Commission.
2. The casing side of this well is completed within the vertical limits and horizontal limits of the Jalmat Pool.
3. The location falls within the limits prescribed for a 160 acre unit by Rule 5 (a), Order No. R-520.
4. The unit consists of continuous and contiguous acreage.
5. The unit lies wholly within a governmental section.
6. In my opinion, the unit is reasonably productive of gas.
7. The unit does not exceed 5230' along its length or width.
