Re: **NON-STANDARD GAS PRORATION UNIT**
COOPER JAL UNIT #107; UNIT K, SECTION 13, TOWNSHIP 24S, RANGE 36E
COOPER JAL UNIT #303; UNIT K, SECTION 13, TOWNSHIP 24S, RANGE 36E
LEA COUNTY, NEW MEXICO

Dear Mr. Lemay,

Texaco Exploration and Production Inc. respectfully requests permission to simultaneously dedicate production from Cooper Jal Units #107 and #303 on a non-standard 120 acre gas proration unit in the Jalmat Tansill Yates Seven Rivers pool. The Cooper Jal Unit #107 was recently recompleted uphole to the Jalmat pool where it is now a producing *gas* well. Producing directly south (in Unit Letter K) of the Cooper Jal Unit #107 is the Cooper Jal Unit #113, an *oil* well also producing in the Jalmat pool. In this case, state regulations dictate that a non-standard 120 acre (gas) proration unit be dedicated to the Cooper Jal Unit #107 and #303 and a standard 40 acre (oil) proration unit be dedicated to the Cooper Jal Unit #113. A C102 plat is attached to illustrate the proposed acreage dedications.

Copies of this letter have been sent to surrounding offset operators of the subject wells.

If you have any questions concerning this request please contact me @ (505) 397-0426.
Thank you very much for your cooperation.

Sincerely,

Darrell J. Carriger
Engineering Assistant
