COMPANY Humble Oil & Refining Company

Box 2347, Hobbs, New Mexico

(Address)

LEASE J. M. Cooper WELL NO. 1 UNIT F S 14 T 24-S R 36-E

DATE WORK PERFORMED 8-14 to 8-15-55 POOL Jalnet

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off

☐ Beginning Drilling Operations

☐ Remedial Work

☒ Plugging

☐ Other \_\_\_\_\_

Detailed account of work done, nature and quantity of materials used and results obtained.

Spotted cement plug from 3064 to 2864 with 20 sacks neat cement. Attempted to pull casing, could get no stretch. All casing left intact. Filled interval from 2864 to 10 feet below surface with heavy mud, spotted 10 foot cement plug in top of 4-3/4-inch casing with two sacks of neat cement and installed permanent marker. Celler was filled and the location levelled and cleared of junk.

(Place)

July 29, 1955  
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the J. M. Cooper

Humble Oil & Refining Company  
(Company or Operator)

Well No. 1 in 7 (Unit)

SE  $\frac{1}{4}$  SW  $\frac{1}{4}$  of Sec. 14, T. 24-S, R. 26-E, NMPM., John Pool

San County.

FULL DETAILS OF PROPOSED PLAN OF WORK  
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Intended procedure:

1. Spot a 200-foot cement plug from 3044 to 2844 feet,
2. Shoot and pull the 4-3/8-inch casing at approximately 2800 feet,
3. Spot a 200-foot cement plug 100 feet below and 100 feet above the cut (from 2900 to 2700 feet if the casing is cut at 2800 feet),
4. Place a 10-foot plug in top of the 7-5/8-inch surface pipe,
5. Place marker over well as required by the New Mexico Oil Conservation Commission.

All intervals between plugs are to be filled with a mud laden fluid.

Average daily production of gas during June 1955: 465 Mcf/day w/70 bbls water (est.).  
Offset operators have been notified of our intention to plug said well.

AUG - 3 1955

Job

# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

THE first question which presents itself to the mind, is, what was the cause of the origin of the earth? and the answer is, that it was the result of a process of condensation, which took place in the æther, or in the space between the stars.

The æther, or the space between the stars, was at first a vast, empty, and dark region, in which the stars were scattered like islands in a sea of darkness. But as the stars were not perfectly stationary, they moved in various directions, and in the course of time they came into contact with each other, and their mutual attraction caused them to coalesce, and form a new system.

This process of condensation, which is called the process of gravitation, is the cause of the formation of all the celestial bodies, and of the earth itself. It is the force which draws the particles of matter together, and causes them to form a solid mass.

The process of gravitation is also the cause of the motion of the stars, and of the planets. It is the force which keeps the planets in their orbits, and causes them to revolve round the sun.

The process of gravitation is also the cause of the motion of the earth, and of the moon. It is the force which keeps the moon in its orbit, and causes it to revolve round the earth.

The process of gravitation is also the cause of the motion of the sun, and of the other stars. It is the force which keeps the sun in its orbit, and causes it to revolve round the centre of the universe.

The process of gravitation is also the cause of the motion of the clouds, and of the winds. It is the force which draws the air together, and causes it to form a mass.

The process of gravitation is also the cause of the motion of the water, and of the ice. It is the force which draws the water together, and causes it to form a mass.

The process of gravitation is also the cause of the motion of the fire, and of the air. It is the force which draws the fire together, and causes it to form a mass.

The process of gravitation is also the cause of the motion of the earth, and of the moon. It is the force which keeps the moon in its orbit, and causes it to revolve round the earth.
