Re: Application by J. R. Cone for  
120-acre Non-Standard Gas Pro-  
ration Unit, Jalmat Gas Pool.

Dear Sir:

Comes now J. R. Cone, an independent producer with offices in Lubbock, Texas, who respectfully requests approval of a non-standard gas proration unit as an exception to those provisions of Order No. R-520 which pertain to the Jalmat Gas Pool, and in support thereof does state:

1. Applicant is the owner of oil and gas operating rights under all of the E/2 SE/4 and NW/4 SE/4 of Section 22, T-24-S, R-36-E, NMPM, Lea County, New Mexico, being 120 acres more or less, said lease being known as the J. R. Cone Magnolia-Myers lease.
2. Applicant completed his Magnolia-Myers No. 4 well on April 18, 1956 as a dry gas producer from the Yates formation at a location 1980 feet from the South line and 660 feet from the East line of the said Section 22. Three other wells have been drilled on the above-described 120-acre lease, all having been completed originally in the Seven Rivers formation. Two of these wells have been permanently abandoned. The third well, now known as Magnolia Petroleum Company's Myers Well No. 1, stands shut in after becoming depleted in the Seven Rivers formation and subsequent efforts to establish Yates gas production therein failed.
3. The said J. R. Cone Magnolia-Myers No. 4 well encountered the Yates formation at a depth of 3154 feet and is completed in the Yates formation through casing perforations between 3154 feet and 3308 feet.
4. The aforesaid well therefore is located within the vertical and the horizontal limits of the Jalmat Gas Pool as defined in the regulations of the Oil Conservation Commission.
5. It is impractical at this time to pool Applicant's said lease with adjoining acreage in the Jalmat Gas Pool.
6. Applicant respectfully requests that all of the E/2 SE/4 and NW/4 SE/4 of Section 22, T-24-S, R-36-E, NMPM be designated as a 120-acre gas proration unit for J. R. Cone Magnolia-Myers Well No. 4 in exception to Rule 5 (a) of Order No. R-520.

Re: Application for U.S. Mine for  
180-acre non-leased gas zone  
within Unit, Tuleman Gas Field.

Dear Sir:

James Earl J. Jones, an independent producer with offices in  
Mexico City, Mexico, who respectfully requests approval of a non-leased gas  
zone within Unit as an exception to the provisions of Order No. 1-1950  
which relates to the Tuleman Gas Field, and in support thereof states:

1. Applicant is the owner of oil and gas operating rights  
under all of the 180-acre and 180-acre of Section 28, T-24-N, R-24-E,  
T-24-N, R-24-E, being 180 acres more or less, said lease  
being known as the J. E. Jones (Mexico City) Lease.

2. Applicant contacted the Tuleman Gas Field No. 4 well on April  
11, 1952 as a first gas producer from the Tuleman formation at a location  
1 1/2 feet from the south line and 800 feet from the east line of the said  
Section 28. Three other wells have been drilled on the above-described  
180-acre lease, all having been completed originally in the Tuleman  
formation. Two of these wells have been permanently abandoned. The  
third well, now known as Tuleman Gas Field No. 4, was  
shut in after producing gas in the Tuleman formation and  
subsequent efforts to produce gas from the Tuleman formation failed.

3. The said J. E. Jones (Mexico City) Lease No. 4 well commences  
the Tuleman formation at a depth of 314 feet and is completed in the Tuleman  
formation through casing perforations between 314 feet and 328 feet.

4. The Tuleman well therefore is located within the vertical  
and horizontal limits of the Tuleman Gas Field as defined in the regu-  
lation of the U.S. Conservation Commission.

5. It is requested that the time to produce Tuleman's said  
zone be adjusted under the Tuleman Gas Field.

6. Applicant respectfully requests that all of the 180-acre  
and 180-acre of Section 28, T-24-N, R-24-E, T-24-N, R-24-E, be designated as a 180-  
acre gas production unit for J. E. Jones (Mexico City) Lease No. 4 in  
accordance with the provisions of Order No. 1-1950.

Page 2. Application of J. R. Cone for 120-acre non-standard gas proration unit for his Magnolia-Myers Well No. 4, Jalmat Gas Pool.

7. Creation of the proposed non-standard gas proration unit and the assignment of the acreage therein to the above-mentioned well is in the interest of conservation and will protect correlative rights.

8. A plat showing the said lease and well together with offset ownership is attached hereto.

9. A copy of this application with plat attached has been mailed to each offset operator to the said lease, to wit:

Phillips Petroleum Co.  
P. O. Box 2105  
Hobbs, New Mexico

R. Olsen Oil Co.  
Drawer Z  
Jal, New Mexico

Stanolind Oil & Gas Co.  
P. O. Box 68  
Hobbs, New Mexico

Respectfully submitted,

J. R. Cone
