(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 2, 1937

Well No. A-1 is located 3510 ft. from N line and 300 ft. from E line of sec. 22
22 (34 Sec. and Sec. No.) 31-3 (Twp.) 31-3 (Range) N.M. P.M. (Meridian)
Carson (Field) Leon (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3345 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was plugged back from 3514 (original total depth) to 3409. The 7" casing was perforated from 3404 to 3505 on 7/15/37 with a show of gas at 3371. This perforated interval tested 475,000 cubic feet of gas.

On 7/23/37 the well was treated with 2000 gallons of acid and on test the well produced 222 barrels of oil and 2400 barrels of water with 1,500,000 cubic feet of gas.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
