

NEW MEXICO STATE LAND OFFICE
SANTA FE, NEW MEXICO

DEPARTMENT OF THE STATE GEOLOGIST
NOTICE OF INTENTION TO TEST WATER SHUT-OFF

Notice must be given to the State Geologist or to the proper Oil and Gas Inspector at least five days before the test. It is desirable that a representative of the Department of the State Geologist witness the water shut-off before drilling into the productive sand whenever possible. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to sender. Submit this notice in triplicate.

Hobbs, New Mexico. N. Mex., July 28th, 1935

Mr. E.H. Wells

State Geologist,
Santa Fe, New Mexico.

Dear Sir:

You are hereby notified that we intend to test the shut-off of water in S.R. Cooper
Well No. 2 in SE/4 of Sec. 23, T. 24, R. 34
N. M. P. M., Cooper Oil Field Lee County,

1. NAME OF THE PROJECT
2. DATE OF THE PROJECT

3. TITLE OF THE PROJECT
4. OBJECTIVE OF THE PROJECT

The purpose of this project is to develop a system that can automatically generate reports from data stored in a database. The system will be able to generate reports in a variety of formats, including HTML, PDF, and CSV. The system will also be able to generate reports on a scheduled basis, and will be able to generate reports on a variety of data, including sales, inventory, and customer data.

The system will be developed using a variety of technologies, including Java, JavaScript, and SQL. The system will be developed using a variety of frameworks, including Spring, Struts, and JSP. The system will be developed using a variety of databases, including MySQL, Oracle, and Microsoft SQL Server.

The system will be developed using a variety of tools, including Eclipse, NetBeans, and IntelliJ IDEA. The system will be developed using a variety of libraries, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito.

The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito.

The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito.

The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito.

The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito. The system will be developed using a variety of testing frameworks, including JUnit, Mockito, and Mockito.
