Carlsbad, New Mexico  
September 5, 1934

Humble Oil & Refining Co.,  
McCombs, Texas.

Att: Mr. Barbour.

Dear Sir:

Regarding your Coates number one and  
also your Thomas number one in the Cooper Area.

Upon checking the amount of cement to  
be used with the 9-5/8" casing, I find that the  
amount specified in your notices does not comply  
with the Rules and Regulations as adopted: Aug.  
1, 1934; in that the amount of cement necessary  
to cement this string back to the surface is far  
beyond 350 sacks.

Since that was a meeting on September  
21, 1934 and new Rules and Regulations adopted  
August 1, 1934 for wells in this area, it is  
necessary that I ask operators to comply with  
these regulations.

Trusting you will check into these two  
cases and alter your program accordingly. I  
would appreciate an early reply.

Very truly yours,

J. D. Hunter,  
State Oil & Gas  
Inspector

Encl: New Regulations.
