Notice of intention to do the work (was) (~~XXXX~~) submitted on Form C-102 on January 10, 1955,  
(Cross out incorrect words)

and approval of the proposed plan (was) (~~XXXX~~) obtained.

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Seven inch oil string is set in this well at 2930'. The well was cleaned out to 3132'. Plug back depth is now 3127'. Liner, 4 1/2" O.D. Hydrill 12 lb., was set from 3132' to 2733' and hung in the 7" with a B.O.T. Type C hanger. The 4 1/2" flush joint was cemented with 150 sacks of regular cement. The Yates pay was perforated with 2 jet shots/ft. from 3020' to 3104'. These perforations were then sandfraced by Halliburton with 10,000 gallons of treatment. The well was swabbed off and completed for 412,000 CFPD flowing into El Paso Natural Gas Company's intermediate pressure gas system. Before setting liner and repairing well it was incapable of flowing gas from the Yates zone into El Paso Naturals intermediate pressure system.
