Re: Paul P. Scott Trust and  
Clara T. Scott Agency  
R. L. Gates A-23 #1  
Jalmat Gas Field  
Lea County, New Mexico

Dear Mr. Ramey:

Attached is an original and four copies of your Form C-110 covering the subject well in the Jalmat Field. I sent your Form C-104 requesting an allowable for this well on June 12th but was unable to inclose the Form C-110 at that time because we did not have Mrs. Scott's signature.

I reported the test on the Gates #1 well by the El Paso Engineer as being 1½ million cubic feet per day on a 27/64" choke on the Form C-104 and also on the Federal Form that I sent to you. Since that time, Mr. Jack Whitling with El Paso Gas Company in Jal, New Mexico has informed me that the actual calculations on this test showed 1,648 MCFG/PD on the 27/64" choke with a pressure of 375# on the tubing at the beginning of the test and a pressure of 372# at the end of the 24 hour test.

If you need any additional information in order to give us an allowable on this gas well, please call me collect at Riverside 8-5471.

Sincerely yours,

*Bob Ray*
