17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was plugged and abandoned September 23, 1950. Due to waterflows into non-unitized intervals, the New Mexico Oil Conservation Commission has ordered that this well be replugged to meet current standards. Skelly Oil Company proposes to perform the following work:

- 1) Move in workover rig.
- 2) Drill out surface plug and cement plug 2760-2790'.
- 3) Spot a 30 sack cement plug across the 8-5/8" OD casing shoe.
- 4) Perforate 8-5/8" OD casing with two holes at approximately 1100'.
- 5) Squeeze perfs. at 1100' with approximately 200 sacks of cement.
- 6) Spot 20 sack cement plug to surface.

All intervals not cemented will be filled with 10.2# mud.

NOTE: This procedure has been discussed and given verbal approval by the New Mexico Oil Conservation Commission District Office in Hobbs, New Mexico.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
