INTERNATIONAL CONFERENCE

1954

REPORT

The International Conference on the Peaceful Uses of Atomic Energy was held in Geneva, Switzerland, from September 2 to 13, 1954. The conference was organized by the United Nations and the International Atomic Energy Commission (IAEC). The main purpose of the conference was to discuss the peaceful uses of atomic energy and to establish a framework for international cooperation in this field.

1. Introduction

The conference was attended by representatives from 32 countries, including the United States, the Soviet Union, the United Kingdom, France, and the United Nations. The conference was held in the spirit of international cooperation and the peaceful uses of atomic energy.

The conference was organized into three main sections: the General Assembly, the Scientific Committee, and the Technical Committee. The General Assembly was responsible for the overall organization and administration of the conference. The Scientific Committee was responsible for the scientific aspects of the conference, and the Technical Committee was responsible for the technical aspects.

The conference was held in the spirit of international cooperation and the peaceful uses of atomic energy. The conference was a success in many ways, and it was a landmark event in the history of international atomic energy cooperation.
