except as follows:

OIL CONSERVATION COMMISSION,
By [Signature]
Title OIL & GAS INSPECTOR

Skelly Oil Company
Company or Operator
By [Signature]
Position Dist. Supt.
Send communications regarding well to
Name Skelly Oil Company
Address Drawer "D"
Hobbs, New Mexico

CHAPTER IV

THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its various features.

THE EARTH AND ITS PARTS

The earth is a sphere which is divided into four main parts: the crust, the mantle, the core, and the atmosphere. The crust is the outermost layer of the earth and is composed of solid rock. The mantle is the layer below the crust and is composed of molten rock. The core is the innermost layer of the earth and is composed of molten metal. The atmosphere is the layer of gas which surrounds the earth.

THE ORIGIN OF THE EARTH

THE EARTH AND ITS PARTS

The earth is a sphere which is divided into four main parts: the crust, the mantle, the core, and the atmosphere.

The crust is the outermost layer of the earth and is composed of solid rock.

The mantle is the layer below the crust and is composed of molten rock.

The core is the innermost layer of the earth and is composed of molten metal.

The atmosphere is the layer of gas which surrounds the earth.

The earth is a sphere which is divided into four main parts: the crust, the mantle, the core, and the atmosphere.
