

OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

March 6, 1956

Date _____

TO:

Shelly Oil Co.

Box 38

Hobbs, New Mexico

Gentlemen:

In accordance with the provisions of Commission Order No. R-767,
H. O. Sims #2-H 4-23-37
your _____,
Lease and Well No. _____ S-T-R
which is producing from the Queen formation, has been
placed in the Langlie-Mattix Pool, and from this date forward
will be subject to the Commission's rules and regulations governing
that pool.

You are hereby instructed to file Form C-110 in quintuplicate with
the Hobbs office showing the change in pool designation.

All future Commission reports for this well must be filed under
the name of the pool in which it is now located.

Figure 1. The effect of the concentration of the H_2O_2 solution on the amount of the H_2O_2 consumed in the reaction of the H_2O_2 solution with the H_2O_2 solution.

$\alpha \in \mathbb{R}^n$ and $\beta \in \mathbb{R}^m$ are the parameters of the model. The model is trained by minimizing the loss function $\mathcal{L}(\alpha, \beta)$ over the training data. The loss function is defined as the sum of the squared residuals of the model. The model is trained using the gradient descent method. The model is trained until the loss function reaches a minimum value. The model is then used to predict the output of the system.
