CHANGE IN POOL DESIGNATION -- From Langlie Mattix SR Qn GB  
To: Jalmat-T-Y-SR

DOYLE HARTMAN  
STEVENS B-7 #2, 1650/N & E, Sec. 7, T23S, R37E

Per Paul Kauts, OCD Geologist, the above-referenced well is completed with the majority of the open hole interval being in the Jalmat Pool.  
(OH 2738--3540 -- Top Langlie Mattix Pool 3457 -- 83' overlap.)

This well has been carried in the OCD records as being in the Langlie Mattix SR Qn GB Pool, but it should be changed to the JALMAT T-Y-SR POOL. R-520 allowed for exceptions for wells with OH intervals in both pools.

According to NSP-1632 the Stevens B-7 #2 is to share a 157 acre Jalmat proration unit with Stevens B-7 #13 (S/2 N/2 of Sec. 7).
