New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

ILLEGIBLE

We are the operators of the following producing wells in the Langlie-Mattix Field, and we are asking exception to the no-flare order for reasons set out below:

1. Wells - W. H. Black et al, John J. Redfern, Jr. #1, NW/4 NW/4, Section 8, T-23-S, R-37-E; and John J. Redfern, Jr. #2, SW/4, NW/4, Section 8, T-23-S, R-37-E, Lea County. These wells are located in the Langlie-Mattix Field., producing from the Penrose Sand.
2. Volume - Gas-oil ratio of well #1 - 1190. Gas-oil ratio of well #2 - 1534. Volume per month - 3630 MCF (approximately)
3. Flat - Flat is attached showing offset operators and general area surrounding this lease.
4. Outlet - Skelly Oil Company has checked the gas production from these Redfern Wells. They have advised us that due to the present activity in this immediate area, they are delaying extension of gathering system at this time to assure installation of lines of sufficient size to handle gas production. We are assured that gas contract is being forwarded from their Tulsa office. They advise that they are certain connection will be made within 90 days.

For the above reasons, we request that exception to the no-flare general order be made on the afore mentioned wells until such time as outlet is provided.

Yours very truly,

W. H. Black
