Well No. 7 is located 180 ft. from N line and 180 ft. from E line of sec. 9

18/4 18/4 9 23 7E 180
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Langley Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~datum~~ ground above sea level is 323 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to rotary drill a 12 1/4" hole and set 8 5/8" casing at 40' and cement to surface. The well will then be rotary drilled to a depth of 365' with a 7 7/8" hole and 5 1/2" 11/2 casing set through. This casing will be cemented with 250 sand in the conventional manner and then cemented with 125 sand through a stone tool, which will be set at approximately 130', to isolate the Santa Fea water zone from the salt section. Top of salt 225'. Top zone 285'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
