Hughes "A-2"

Well No. 10 is located 1650 ft. from S line and 660 ft. from E line of sec. 9NE 1/4 - SE 1/4 - 9
(1/4 Sec. and Sec. No.)23-S
(Twp.)37-E
(Range)RMPM
(Meridian)Langlic-Mattix
(Field)Lea
(County or Subdivision)New Mexico
(State or Territory)

Ground Level

The elevation of the ~~surface~~ above sea level is 3294 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to rotary drill a 11" hole and set 8-5/8" 24# casing at 375' and cement to surface. The well will then be rotary drilled to estimated depth of 3700' with a 7-7/8" hole and set 5-1/2" 14# oil string casing at total depth. The oil string will be cemented with 200 sacks and then cemented with 150 cu ft through a stage tool set at approximately 1125' to isolate the Santa Rosa water zone from salt section. Top of salt estimated 1180', top of Penrose estimated 3485'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
