Midland, Texas

[illegible]

Figure 1 consists of two scatter plots. The left plot shows a positive correlation between the number of children and the number of adults, with a regression line indicating a positive slope. The right plot shows a negative correlation between the number of children and the number of adults, with a regression line indicating a negative slope.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies growing on the selective medium. The results are the mean of three independent experiments. Error bars represent standard deviation.
