

OIL CONSERVATION COMMISSION

P. O. BOX 2045

HOBBS, NEW MEXICO

Date March 6, 1956

TO:

Shally Oil Co.

Box 38

Hobbs, New Mexico

Gentlemen:

In accordance with the provisions of Commission Order No. R-767,  
your Stealer #6-J 17-23-37,  
Lease and Well No. S-T-R,  
which is producing from the Queen formation, has been  
placed in the Langlie-Mattix Pool, and from this date forward  
will be subject to the Commission's rules and regulations governing  
that pool.

You are hereby instructed to file Form C-110 in quintuplicate with  
the Hobbs office showing the change in pool designation.

All future Commission reports for this well must be filed under  
the name of the pool in which it is now located.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28 °C. The cell concentration of the strains was adjusted to 1.0 × 10<sup>8</sup> cells/ml. The cell suspension was mixed with the plant tissue and the transformation efficiency was determined. The results were expressed as the mean ± SD of three independent experiments. The different letters indicate significant differences (*p* < 0.05) by the Duncan's multiple range test.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.

[illegible]
$$0 \rightarrow \mathcal{O}_X(-n) \rightarrow \mathcal{O}_X(-n+1) \rightarrow \mathcal{O}_X(-n+2) \rightarrow \cdots \rightarrow \mathcal{O}_X(-1) \rightarrow \mathcal{O}_X \rightarrow 0$$
$$= \frac{1}{\sqrt{\pi}} \int_{-\infty}^{\infty} e^{-t^2} dt = \frac{1}{\sqrt{\pi}} \cdot \sqrt{\pi} = 1$$
