RE: STEELER SWD #1
UNIT I, S20-T23S-R37E

Gentlemen:

An inspection was made on the above referenced plugged well site in November 1991 by an Oil Conservation Division Field Representative.

Before the location can be properly released, the tank battery needs to be removed from the location.

When this work has been completed please notify our OCD office by signing the bottom portion of this letter and return it to the address stated above, or call Ray Smith at 505-393-6161.

Please check the location thoroughly before contacting this office for reinspection so that unnecessary trips can be avoided.

Very truly yours,

JERRY SEXTON
District I Supervisor
