

## OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO

Warren:

I cannot approve the mechanics of this installation.

It is nowhere mentioned or shown in the application for DC that a Garrett Sleeve or Otis Choke will be utilized (or other device).

If we should ever require that a BHP bomb be run for the Jalmat Gas BHP he will have to kill the Jalmat to bomb. Therefore, as his proposed installation now stands, I do not believe he has enough positive control over both zones.
