Gentlemen:

Following is a Notice of Intention to do certain work as described below at the J. C. Johnson Lease

Skelly Oil Company

(Company or Operator)

Well No. 3 in 40 (Unit)

SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 20, T. 23S, R. 37E, NMPM., Penrose Skelly Pool

Lee County.

FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

In 1946 this well was drilled to 6957' and found to be non-productive in all pays. The well then was temporarily abandoned after plugging back to 3440' with cement and with mud laden fluid from 3440' to 50' and with cement from 50' to surface. A string of 8-5/8" casing set at 1066' and a string of 7" casing set at 3591' was left in the well.

Since wells in this field have responded favorably to the fracture treatment, we now plan to re-enter the well and clean out to approximately 3700' and treat and test the Yates and Grayburg Formations.
