

## OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	7"	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

OIL CONSERVATION COMMISSION,  
SANTA FE, NEW MEXICO  
Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the \_\_\_\_\_

Gulf Oil Corporation G. G. Travis Well No. 1 in the \_\_\_\_\_  
Company or Operator Lease  
NE SE of Sec. 21, T. 23 S, R. 37 E, N. M. P. M.,  
Teague Field, Lea County.

The dates of this work were as follows: Cemented on Oct. 2, 1948. Tested on Oct. 5, 1948.

Notice of intention to do the work was (~~was not~~) submitted on Form C-102 on October 3, 1948 19\_\_\_\_  
and approval of the proposed plan was (~~was not~~) obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

After waiting forty-eight hours, the hole was washed down and the casing tested with 1200# pressure applied for 30 minutes. The cement was drilled out to 9600', which is 61' above the casing shoe, and the casing tested with 1200# pressure applied for 30 minutes. Both tests were OK, and after approval of Mr. Yarbrough, State Oil and Gas Inspector, preparations were made to perforate casing and complete the well.

Top of cement back of 7" casing @ 5400' per temperature survey.

# THEORY OF THE EARTH

## CHAPTER I

The earth is a sphere, and its surface is covered by water. The land is divided into continents and islands. The continents are the large masses of land, and the islands are the small pieces of land. The water is divided into oceans and seas. The oceans are the large bodies of water, and the seas are the smaller bodies of water. The land is divided into countries and states. The countries are the large political divisions, and the states are the smaller political divisions. The water is divided into rivers and lakes. The rivers are the large bodies of water that flow into the oceans, and the lakes are the smaller bodies of water that are surrounded by land. The land is divided into mountains and valleys. The mountains are the high, rugged areas of land, and the valleys are the low, flat areas of land. The water is divided into icebergs and glaciers. The icebergs are the large pieces of ice that float in the oceans, and the glaciers are the large masses of ice that flow down the mountains.
