(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

January 20, 1949

Well No. 7 is located 660 ft. from S line and 660 ft. from W line of sec. 22
SW 1/4 of 22 233 37E NMPM
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Teague Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3304 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On January 4, 1949, we advised that a 5" OD liner would be placed in the bottom of the hole opposite the pay formation. However, flowing tests now indicate that the liner will not be necessary at this time and it is planned to complete the well without the liner installation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Gulf Oil Corporation
