### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After waiting eighty-six hours, the 7" casing was tested with 1200/ pressure applied for 30 minutes. The plug was drilled and the casing and cement were tested with 1200/ pressure applied for 30 minutes. Both tests were OK, and preparations are being made to complete the well.

Top of cement back of 7" csg @ 4925' per temperature survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
