DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After waiting thirty-six hours, the casing was tested with 500# pressure applied for 30 minutes. The plug was drilled and the casing tested with 500# pressure applied for 30 minutes. Both tests were OK, and preparations are being made to drill ahead.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
