The elevation of the derrick floor above sea level isft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After waiting thirty-six hours, the 13-3/8" casing was tested with 500% pressure applied for 30 minutes. The plug was drilled and the casing tested with 500% pressure applied for 30 minutes. Both tests were 0%, and preparations are being made to drill sheed.
