(State or Territory)

The elevation of the derrick floor above sea level is - ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

9 5/8" casing program to be changed as follows:

9-5/8" CD, 36, casing to be set to 2900' with Halliburton Multiple Stage Cementer to 1070'. First stage will consist of 1200 sacks of 2 1/2 gal and 100 sacks of common Portland neat bulk cement. Second stage through stage cementing collar to 1070' will consist of 340 sacks of common Portland neat bulk cement. No temperature survey will be run.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
