13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This is a request to maintain this well on temporary abandon status.  
Attached is a copy of the pressure test chart.

The La Munyon No. 2 is a direct offset to Oxy's Langlie Mattix waterflood and as such it is possible that the well will respond to the waterflood. This has happened on another well that we operate that is an offset to this same flood. As with any waterflood, it is impossible to accurately predict a time frame that the well may respond; however, we will put a time frame of January 1, 2000 waterflood response. Plugging this well may result in a loss of revenue for the BLM.
