(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

April 5, 1949

Well No. 3 is located 1980 ft. from N line and 1980 ft. from W line of sec. 29
Langlie-Mattix 23E 37E NMIM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Langlie-Mattix Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3305 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Permission is hereby requested to change producing method from ordinary pumping well to Closed Gas Lift System, including the introduction of gas from outside source and the use of flow valves, at our LaMunyon Well No. 3. Gas will be obtained from the Gulf Oil Corporation's J. F. Janda "G" #1 gas well in which the Yates and Seven Rivers formations are exposed from 2885' to 3140' and from 3140' to 3352', respectively. The J. F. Janda "G" No. 1 gas well is located in the NE1/4 of Sec. 24, Twp. 23N, Rge. 36E.

Gas produced with the oil from LaMunyon Well No. 3 is sold to the El Paso Natural Gas Company for the manufacture of gasoline.

If permission is granted, please advise of any special regulations governing gas lift operations, and of any special reports required.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Gulf Oil Corporation
