(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill with Rotary Tools to the Seven Rivers-Queen formation at about 3,500'. Set 8 5/8" casing at 300' with cement circulated. If productive, set 5 1/2" casing to Total Depth and cement with about 250 sacks, which gives a calculated fillup of 1,692'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company TEXAS PACIFIC COAL AND OIL COMPANY

Address P. O. Box 2110

Fort Worth 1, Texas
