### FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well has dropped off in production to such a low rate that it is not economically feasible to continue producing the oil. In the last three months the average daily oil production was 1.13 Bbls. per day. It is therefore requested that we be permitted to discontinue the oil production and perforate from 3290 to 3350 and 2830 to 3060 opposite potential gas zones and attempt recompletion as a gas well. If we are able to complete as a gas well we will set a Lane-Wells Bridging plug at base of 7" casing and separate the oil and gas zones.
