## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In addition to the casing program outlined on our "Notice of Intention to Drill" filed August 6, 1951, we desire to add 150' of 13" 48 casing to be cemented with 250 sacks cement.

This casing is necessary to control shallow gas if encountered in this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
