| 23. PROPOSED CASING AND CEMENTING PROGRAM                                                                                                                                                                                                      |                                    |                                                                  |                                                                 |

| SIZE OF HOLE | SIZE OF CASING | WEIGHT PER FOOT              | SETTING DEPTH | QUANTITY OF CEMENT |
|--------------|----------------|------------------------------|---------------|--------------------|
| 8-3/4"       | 7"             | CURRENT RECORD<br>23# to 26# | 7,171         | 500 Sacks.         |

Propose to:

Pull tubing and packer. Spot 35 sacks cement plug 7,100 to 7,225. Wait on cement and test casing with 2,000#. Run Gamma Ray - Neutron Survey. Run cast iron bridge plug and set at 5,850' and put 1 sack cement on top of plug. Perforate 7" casing with two 1/2" holes at 5,290', 5,300', 5,325', 5,375', 5,380', 5,542', 5,552', 5,570', 5,580', 5,587', 5,598', 5,615', 5,619', 5,650', 5,660', 5,665', 5,675', 5,690', 5,703', 5,720', 5,733', 5,745', 5,762', and 5,780'.

Acidize well with 5,000 gallons 15% acid, run tubing and test.

This well to be completed as Teague Elinebry Oil well.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

24.

## Instructions

**General:** This form is designed for submitting proposals to perform certain well operations, as indicated, on all types of lands and leases for appropriate action by either a Federal or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

**Item 1:** If the proposal is to redrill to the same reservoir at a different subsurface location or to a new reservoir, use this form with appropriate notations. Consult applicable State or Federal regulations concerning subsequent work proposals or reports on the well.

**Item 4:** If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

**Item 14:** Needed only when location of well cannot readily be found by road from the land or lease description. A plat, or plats, separate or on this reverse side, showing the roads to, and the surveyed location of, the well, and any other required information, should be furnished when required by Federal or State agency offices.

**Items 15 and 18:** If well is to be, or has been directionally drilled, give distances for subsurface location of hole in any present or objective production zone.

**Item 22:** Consult applicable Federal or State regulations, or appropriate officials, concerning approval of the proposal before operations are started.
