

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

GETTY OIL COMPANY  
MYERS LANGLIE MATTIX UNIT

WELL NO. 85

1980' FSL and 1880' FWL, Sec. 34-23S-37E

LEA COUNTY, NEW MEXICO

LEASE: New Mexico LC-060825-B

This plan is submitted with our Application to convert the above well to injection. The purpose of the plan is to describe the location of the well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

(1) Existing Roads:

- A. Exhibit "A" is a highway map showing the location of the well. The location is as follows: Take highway 18 from Hobbs to Eunice. From Eunice continue south on highway 18 for approximately 12.5 miles. Turn left on lease access road shown in Exhibit "B", and  
continue approximately 2 miles.
- B. Exhibit "B" is a lease map showing existing roads and the access road to the location.

(2) Planned Access Road:

No new road will be required.

(3) Location of Existing Wells:

- A. Exhibit "B" shows wells within a one mile radius of the well.

(4) Location of Existing Facilities:

- A. Exhibit "C" shows the existing injection line and the line to be layed from it to this well. The new line will be coated and wrapped and buried.

(5) Type of Water Supply:

- A. Water for the workover will be trucked to the well site from Jal, New Mexico over the existing roads shown on Exhibit "B".

(6) Source of Construction Materials:

- A. None Required.

(7) Methods of Handling Waste Disposal:

- A. Drill cuttings will be disposed of in the workover pit.
