DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 18th 290.06 ft of 13-3/8" OD 48# H-40 Seamless Casing was set at 300 feet, cemented with 175 sacks Lone Star Regular Cement, which was circulated into cellar. Cement was allowed to stand under pressure for 36 hours, pressure was released, plug was drilled and well bailed dry after penetrating formation below casing and allowed to stand six hours, hole still bailed dry. Operation was considered an effective water shut off.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
