of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was added to the greater importance to have a complete history of the well. Please state in detail the dates of reworking, together with the reasons for the work and its results.
