DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is to change the designation of this well from No. 4-E to No. 3-D. This well is being completed in the Teague Devonian Field instead of the Teague Ellenburger Field.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
