The elevation of the derrick floor above sea level is **2981** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Work over on this well began 7-24-41. In pulling tubing and packer, the tubing parted, and an extended fishing job resulted. All tubing was recovered, and well c/o to T. D. 3299'. On 10-16-41, well was shot with 185 qts. LNG from 3190 to 3279. Shot was tamped with 1-1/2 yards pea gravel. After shot, well was c/o to 3303 and a limit plug set with top of plug at 3300'. Before shot, well swabbed and bailed 46 bbls. oil in 8 hours. Well was put on pump and on 12-31-41, pumped 53 bbls. oil and 13 bbls. water in 13 hours. Work over completed as of this test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
