Wink, Texas, as of March 4, 1934Following is a ~~notice of intention to do work~~
report of work done on land under ~~lease~~ permit described as follows:**New Mexico****Lea County****Jal (Rhodes Pool)**

(State or Territory)

(County or Subdivision)

(Field)

Well No. **2** **SE $\frac{1}{4}$ Sec. 8** **T 26 S R 37 E** of **N.M.P.M.**
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)The well is located **1980** ft. **N** of **S** line and **1980** ft. **E** of **E** line of sec. **8**
~~1980~~ ~~ft.~~ ~~N~~ ~~of~~ ~~S~~ ~~line~~ ~~and~~ ~~1980~~ ~~ft.~~ ~~E~~ ~~of~~ ~~E~~ ~~line~~ ~~of~~ ~~sec.~~ ~~8~~The elevation ~~above datum~~ above sea level is **2977** ft. (Ground)**DETAILS OF PLAN OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

As indicated in our letter of February 27th, the 9" OD casing in this well, which had parted at 1304', was pulled and re-run with a sleeve made of 11" OD pipe 15' long to act as overshot to connect up with casing in hole. After sleeve was set over 9" OD casing, 200 sacks of cement were pumped down through space between sleeve and casing and then the pipe was lowered until the two collars touched.

After allowing 108 hours for cement to harden, plugs were drilled and job tested with 750 pounds pressure for 3 hours. No returns back of 9" casing was in evidence and the repair is regarded as quite satisfactory.

Approved **March 17, 1934**
